

Dika Laksana Gusta • Backend Engineer

gustalaksanadika@gmail.com • +62 813 3611 0224 • laksanagusta.github.io

Backend Engineer with 5 years of experience developing & maintaining high performance applications using PHP & Go. Skilled in optimizing code, improve application performance, resolving bugs, & customize product feature.

I enjoy working in dynamic environments where I can contribute while learning different skills from others.

experience

IT Staff Jun 2025 - Present
Ministry of Health

Designed and developed multiple AI-powered web applications for the Organization, including Risk Management Application, Expense Extraction Module, and Desk Module. Leveraged Large Language Models (LLMs), intelligent automation, and Agentic Software Development practices to accelerate delivery, streamline business processes, reduce manual workloads, and improve operational efficiency across internal government services

Senior Software Engineer II Sept 2023 - May 2025
McEasy

Developed and maintained new services for third-party integrations with Accurate, Jurnal, and Paper. Designed and developed new features, implemented Test-Driven Development (TDD) practices to improve code quality and reliability, and optimized existing processes to enhance overall system performance and efficiency.

Associate Software Engineer Mar 2022 - May 2023
Sirclo

Developed and maintained client websites using Magento, including designing and developing custom modules based on client requirements. Optimized existing processes to improve application performance and upgraded Magento versions while resolving compatibility issues and bugs resulting from the upgrade process. Integrated websites with payment and shipping gateways, conducted technical research, and assisted other developers in completing development tasks.

Backend Engineer Feb 2021 - Feb 2022
MileAPP

- Developed & Maintained MileApp custom feature using Laravel & Lumen
- Improving API & Webhook performance
- Optimizing custom reports import & exporting process
- Integrated MileApp product through API & Webhook
- Developed & Maintained custom apps flow build with AppView (JSON)
- Collaborated with implementation team & third party to understand client requirement and deliver best solutions
- Mentoring

Software Developer Around May 2019 - Sept 2020
Bosowa

- Developed and maintained Bosowa Utama web applications
- Planned and designed web application architecture and database structures
- Recommended technical solutions and new feature enhancements to management
- Participated in weekly meetings with management to demonstrate development progress and provide project updates
- Led other developers in designing and implementing new features
- Implemented web applications and provided training to end users
- Migrated legacy application data to the latest application platform

education

Bachelor of Informatics Engineering 2014 - 2018
Universitas Surabaya (UBAYA)

Studied at Universitas Surabaya (UBAYA), where I developed a marketplace application as my thesis project. The application enabled university organizations to sell event tickets while allowing users to browse and purchase tickets directly through the app. It was built using PhoneGap, a cross-platform mobile application framework.

skills

PROGRAMMING LANGUAGE	PHP, Javascript/Typescript, Go
FRAMEWORKS	Magento
DATABASES	MySql, MongoDB, Elasticsearch, Redis
OTHER	Agentic AI, Hermes, GraphQL, Docker
TOOLS	Codex, ZED, Opendcode
